Penco Products 2024 Cressman Rd Skippack, PA 19474-0158 Phone 800.562.1000

All orders for built-in combination locks must be accompanied by complete end-user data. Not doing so will delay delivery of the lock portion of your order. If adding to an existing series, the control key series must be referenced as well. See the lock order information form in the Locker Price Book or Quick Ship Lock flyer for reference.

Model 1990 locks are designed for use on specially equipped single point latch lockers only. All lock items shipping from Penco warehouse locations will be shipped loose for installation on the lockers after delivery. Locks are not installed on assembled locker orders. **Rev. 10/2009**
